Magpie quick start card

Print this card and keep it next to your home server.

1. Install

Run the Docker image, open port 8420 in your browser and create the first administrator account.

2. Connect your phone

Scan the pairing code with the Magpie app. New photos upload automatically over Wi-Fi.

3. Stream to the TV with Pebblecast

Pebblecast sends any album to a smart TV on the same network. Choose an album, press the Pebblecast button and pick the screen.

4. Keep a backup

Turn on nightly backups under Settings, Storage. Keep one copy away from home.
